

DORMA ST9600 Series.

DORMA's ST9600 Series heavy duty mortice locksets and latchsets provide exceptional security, enhanced corrosion protection, outstanding dependability and benchmark setting inbuilt functionality.

Designed in Australia to meet the needs of the Australasian market the ST9600 Series premium performance locks and latches are constructed of 316 grade Stainless Steel and Chrome Plated Zinc alloy components housed in a unique two tone, chrome plate, clam shell body.

The Series is complete with a wide variety of lock functions including Nightlatch, Deadbolt, Vestibule, Sliding

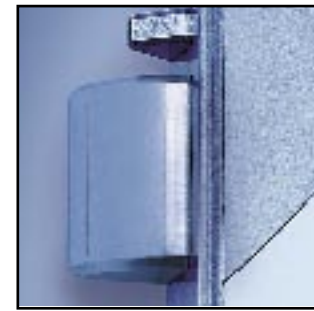

Deadbolt and Combination Lockset ensuring a full range of functions to meet your hardware specification requirements.

Marine grade 316 Stainless Steel face plate, strike plate and 29mm latchbolt provides maximum strength with genuine security and complements the uncompromising approach the ST9600 Series takes to corrosion protection.

To minimise unsightly lever sag the ST9600 Series locks incorporate high strength lever return springs.

The ST9600 Series Heavy Duty Mortice Locks have been designed to allow handing to be easily changed in the field by the installer, incorporating a fully reversible, 316 grade latch bolt for left or right handed operation. Moreover, the latchbolt has been engineered to offer low resistance in operation for smooth positive door latching.

The DORMA ST9600 Series Mortice locks can be used in conjunction with DORMA'S 5200 Series Lever range offering a reliable and stylish option for commercial and residential applications.

ST9600 Series Applications

- Schools and Universities
- Hotels
- Apartments
- Hospitals and Nursing Homes
- Municipal Buildings
- Retail Complexes
- Offices
- Warehouses
- Airports

If you require any technical assistance with this or any other DORMA product, or would like help in preparing your next hardware specification please contact your DORMA sales office for a no cost, obligation free hardware specification service.

ST9600 Series Functions

ST9600 MORTICE NIGHT LATCH

Mortice night latch functions are operated by key outside and by turn snib or key inside and lock automatically when the door is closed. Suits applications such as Cupboards, Risers, Switchboards, Duct doors, Gates.

ST9601 MORTICE DEADBOLT

Mortice deadbolt functions operated by key outside and by turnsnib or key inside. Locked by key or turnsnib when door is closed. Suits additional security requirement applications such as Pivot doors, Gates, Push or Pull plate operated doors.

ST9602 MORTICE VESTIBULE LOCK

Mortice vestibule latch functions operated by key, turn or handle outside and by turnsnib, key and handle inside. These vestibule locks allow for single action egress in compliance with building egress codes. For all vestibule function options specify base mortice lock eg. ST9602SSS. This lock can then be easily adapted to suit function required.

ST9603 MORTICE SLIDING DEADBOLT

Mortice sliding door deadbolt lock functions operated by key or turn outside and by turnsnib or key inside. Locked by key or turnsnib when door is closed. Suits Sliding door installations.

ST9604 MORTICE COMBINATION LOCK

Mortice combination latch functions operated by key, turn or handle outside and by turnsnib, key and handle inside. These combination lock functions allow for both inside and outside handles to be locked. Suits applications such as Offices, Residential and Terraces.
